WORK EXPERIENCE

Accede Ghana — Accra, Ghana
Software Engineer — December, 2022 - Present

- Collaborated with Accede Ghana's UI/UX team to seamlessly transform design concepts into code using Flutter, delivering visually appealing and user-friendly applications.
- Designed and executed a comprehensive suite of tests for client-requested features, enhancing product quality and customer satisfaction.
- Integrated Sentry error monitoring for proactive error resolution in a mobile app, ensuring a seamless user experience in production.

Bismuth Technologies — Kumasi, Ghana
Software Engineer — June, 2022 - December, 2022

- Provided technical guidance and mentorship to colleagues, offering expertise in software development best practices and assisting in problem-solving to enhance the skills and knowledge of the team at Bismuth Technologies.
- Reviewed and provided constructive feedback on code written by fellow developers at Bismuth Technologies, ensuring adherence to best practices and promoting code quality and maintainability.

Dawurobo — Kumasi, Ghana
Sofware Developer - Intern — October, 2021 - January, 2022

- I developed and tested mobile applications for iOS and Android platforms using the Flutter framework, ensuring seamless functionality and user experience.
- Collaborated closely with backend developers, designers, and cross-functional teams to deliver meticulously designed and innovative solutions, ensuring top-tier quality and user experience for Dawurobo's software products.

SKILLS

Programming Languages:	Dart, Python, SQL, HTML, CSS, Javascript,Rust
Frameworks:	Flutter, Next Js
Other Technical Skills:	Git/Github, Docker, REST - API, AWS

PROJECTS

Kacha Agent Mobile Application *Flutter(Dart)*   https://www.kacha.et/
I was part of the team that developed the Kacha digital platform, the very first private payment instrument issuer licensed by the National Bank of Ethiopia. For this project specifically worked on the agent mobile application, where I used the Flutter framework. It included feature like withdrawing funds from ones account, transfer of funds etc

AI drug prescription system *Flutter(Dart), Flask(Python), Scikit Learn*
https://github.com/gyatashoa/doctr
This was what i developed as my capstone project for my final undergraduate studies. This project was a simple system that gave users diseases and their potential cures based on the symptoms given to them. It included a mobile application where the user can enter his or her symptoms, an AI model that is used for prediction, and a backend system that was used for communication between the mobile application and the AI model.

Regular Academy *Flutter(Dart), Google Firebase, AWS Amplify*
https://apps.apple.com/gh/app/regular-academy/id6449842619
I was part of the team that developed this digital platform, that was supposed to provide users of the platform with fully-fledged courses in the form of video contents. On This project, i worked on the mobile platform, which was for both android and iOS, and also the setup for the backend.
